ABOUT ME

I am a dedicated and passionate programming student looking to build a solid foundation in programming.

I am excited about pursuing a career in programming, fuelled by my love for the field and the opportunities it offers. My goal is to make a significant impact by using my skills to solve complex problems and innovate.

Apart from my technical interests, I enjoy reading and sharing knowledge with others, which drives my passion for teaching and mentoring. I am eager to continue growing my expertise and achieve success in the programming industry.

Experience

Project Manager And Backend Developer In Digilab Solutions (2023 – Now)

As the Project Manager at Digilab Solutions, I oversee all commissioned projects, ensuring they meet quality standards and are delivered on time. My responsibilities include coordinating tasks among team members, managing project timelines, and communicating with clients to understand their requirements and provide updates.

In addition to my role as Project Manager, I also work as a Backend Developer. I design, implement, and maintain the server-side logic, databases, and APIs for our projects, ensuring robust and scalable solutions.

About Digilab Solutions

Co-founded Digilab Solutions, a freelance team specializing in software, website, and game development. Initially three members, we've grown to a team of nine, including graphic/UI/UX designers and frontend/backend developers, delivering high-quality digital solutions tailored to client needs.

Education

Senior High School (2022 – 2024)

I consistently achieved high honors and won the programming competition at ACLC College of Tacloban.

Elementary (2010 – 2016)

I was a consistent achiever during my elementary years at San Fernando Central School.
